

Subsea Sports Reel Light Adapter Kit

Thank you for choosing Subsea Sports for your next dive adventure!

The light mount adapter will fit **all** reel models with a **white grip handle**. It is designed to secure dive lights with a 1" diameter tube. An adapter for ¾" diameter tube lights is provided. The fitment is snug by design and *may* require minor adjustments to fit your reel's mount.

What is included:

- Base mount
- Top mount
- 4 stainless steel screws
- ¾" (20mm) adapter (2 halves)
- 6 industrial zip ties, 75lb test rated to -40F (2 required for installation)
- Hex head key

How to install:

1. Slide provided zip ties through the mount holes (2 zip ties)
2. Fit the base mount to the reel over the installed zip ties. The bottom must be flush with with stainless SMB mount.
3. Feed the zip ties through the top slot in the base mount.
4. Zip tie head must be resting on the bottom edge of the SMB mount holes.
5. Tighten both zip ties. There will be no movement when properly secured.
6. Trim accordingly
7. Install the Top Mount using the provided bolts and hex key. Do not tighten all the way
8. *Slide YOUR light in between the two pieces and position where you want it and tighten the bolts in a cross pattern to evenly disperse the tension. You will have a small even gap between the Top and Base Mount once snug.

*Depending on what light you are using, install the Top Mount with or without adapters using the provided stainless steel screws and hex head key. DO NOT over tighten, simply snug the screws in a cross pattern dispersing the tension equally between the four screws. Over tightening will strip the threads – *which is not covered under warranty*.

*Due to the amount of mini dive lights on the market and their varying diameters, you may need to add shims to accommodate your light. We provide a shim adapter for common sizes but even then, there may be a need to add a shim. Shims can be made from everyday plastic components such as place mats etc.
